📍 Embu, Kenya

Profile

I am a motivated Information Technology graduate and full-stack web developer skilled in Next.js, PHP, and JavaScript. With a solid understanding of tools like Supabase, I am passionate about building scalable, dynamic web applications. My portfolio showcases my commitment to learning, creativity, and teamwork, and I'm eager to bring these strengths to innovative IT projects.

Portfolio

Experience (June, 2023-August, 2023)

During my three-month attachment at Ena Vocational Training Centre, I gained practical experience in IT support and system maintenance, where I assisted in managing computer networks and troubleshooting technical issues. I actively contributed to training sessions, enhancing my problem-solving and communication skills while working closely with both the technical team and students in a collaborative environment.
